Waste Management

- General waste services

Our business

Enva is a leading provider of recycling and resource recovery solutions, with locations across the United Kingdom and Ireland. With sustainability at the forefront of our proposition, we recover a broad range of hazardous and non-hazardous waste materials for re-use in manufacturing and energy conversion. We also provide a complete portfolio of industrial, water and waste water services. At Enva we are committed to recycling and resource recovery; it forms the basis of our business strategy and our values.

We support the life cycle of waste products to provide either a second life, such as the production of energy or, in many cases, closed-loop recycling solutions. Our dedication to developing new and innovative products and solutions and extending the life cycle of the world's resources is driving our business forward.

Whilst to many Enva is a relatively new brand, our constituent operations have been around for many years and have significant heritage in the UK and Irish recycling and resource management markets. As a result, we are fortunate to have a highly skilled and experienced workforce who are close to their markets and customers. Operating under a single brand enables us to realise the associated operational and commercial synergies for customers across our key markets.

What we do

Setting new standards in waste collection and management

From one-off collections to ‘total waste management’ solutions, our decades of experience and dedication to our customers has seen us set new industry standards.

We operate a diverse and fully-owned fleet of state-of-the-art collection vehicles, designed to ensure the safe collection and transportation of all general, specialist and hazardous waste materials.

Recycling and recovering as much of the material that we collect maximises the environmental and commercial benefits and keeps landfill disposal to a minimum.

Partnering businesses to deliver a fully compliant and cost-effective service with recovery at its heart is an enabler for modern organisations to meet their commercial and sustainable aspirations.

Where waste cannot be recycled it is used to produce Refuse Derived Fuel (RDF) and Solid Recovered Fuel (SRF) products for energy generation, avoiding landfill.

Our total waste management portfolio of services delivers solutions and benefits across a wide range of industries and sectors:

- Commercial
- Industrial & manufacturing
- Construction
- Engineering
- Education
- Public sector
- Retail
- Automotive
- Leisure

We don't simply collect waste - we transform it.

Commercial waste

Enva delivers the highest level of general waste services across all industries and sectors, supplying a range of container types and collection options. Once collected, all waste is taken to one of Enva's specialist facilities ensuring that as much as possible is recycled or recovered. Waste that cannot be recovered is often used to create a fuel for the production of sustainable energy.

National coverage

Enva National delivers a comprehensive range of waste services to UK businesses by utilising our vetted and approved service partners across the UK. These businesses are regularly audited to ensure that they share our values and meet our customer's service, environmental and health & safety standards. This ability to deliver consistently high-quality services has supported long-term relationships with some of the UK's largest and best-known brands across a range of sectors.

Skip hire

Our national skip hire service provides a flexible, reliable, cost effective and environmentally responsible method of dealing with construction, house clearance or garden waste. Customers can order skips online via our website.

Construction waste

Enva are a proven and leading supplier of waste solutions to the construction, infrastructure and utility industries. By placing the waste hierarchy at the centre of our approach we partner with contractors to reduce waste production and deliver improved resource efficiency.

Hazardous & Specialist waste

Hazardous waste can be highly complex and hugely varied which requires it to be managed safely and to the highest environmental standards. As with all waste types, our focus is on recycling and recovery through new and innovative processes. If waste cannot be recycled or recovered it will be treated to ensure it can be disposed of safely and compliantly. Whether it's oils, contaminated soil, clinical waste or chemicals, our experience and expertise means a solution is almost always available.

General and recyclable waste disposal and national skip hire services

We offer a general waste package, which has been developed to Revise, Reduce and Recycle general waste wherever possible. Our carefully chosen network of partners operate on a national basis to offer scheduled collections of eurobins, front and rear loaders and roll on roll off containers.

Eurobin, Bag collection, Confidential waste

Designed for light compactable waste and recyclables are ideal for small businesses and businesses with limited space or access issues. **Bins are available in 140, 240, 660 and 1100 litre sizes.** Bag collections are available for general waste and dry mixed recycling. Confidential and secure destruction sacks with consignment notes also available.

Front End Loader

Suitable for lighter compactable waste and recyclables and ideal for the larger commercial and industrial sector.

Skips

Predominantly used for site clearances, bulky waste items, wood and metal.

RORO

Suitable for heavy, bulky and non-compactable waste.

Internal Recycling

Internal Office Recycling Boxes are available for either card and paper only, or for dry mixed Recyclables i.e card/paper/clean empty plastic bottles/cans/clean empty food packets.

2 Yard Mini Skip

Length: 1.53m | **Width:** 1.01m
Height: 0.76m | **Cubic Capacity:** 1.53m³
Holds approximately 20/30 bin bags

4 Yard Midi Skip

Length: 1.8m | **Width:** 1.22m
Height: 0.96m | **Cubic Capacity:** 3.06m³
Holds approximately 30/40 bin bags

6 Yard Builders Skip

Length: 2.945m | **Width:** 1.865m
Height: 1.236m | **Cubic Capacity:** 4.6m³
Holds approximately 50/60 bin bags

8 Yard Maxi Builders Skip

Length: 3.09m | **Width:** 1.865m
Height: 1.537m | **Cubic Capacity:** 6.12m³
Holds approximately 60/80 bin bags

8 Yard Enclosed Maxi Builders Skip

Length: 3.090m | **Width:** 1.865m
Height: 1.537m | **Cubic Capacity:** 6.12m³
Holds approximately 60/80 bin bags

12 Yard Bulk Skip

Length: 3.853m | **Width:** 1.865m
Height: 1.866m | **Cubic Capacity:** 9.18m³
Holds approximately 100/120 bin bags

14 Yard Bulk Skip

Length: 4.005m | **Width:** 1.865m
Height: 2.050m | **Cubic Capacity:** 10.7m³
Holds approximately 110/130 bin bags

16 Yard Bulk Skip

Length: 4.152m | **Width:** 1.865m
Height: 2.047m | **Cubic Capacity:** 12.23m³
Holds approximately 120/140 bin bags

12 Yard Enclosed Skip

Length: 3.853m | **Width:** 1.865m
Height: 1.866m | **Cubic Capacity:** 9.18m³
Holds approximately 100/120 bin bags

20 Yard Roll-on-Roll-off Skip (Suitable for LIGHT waste types only)

Length: 6.145m | **Width:** 2.55m
Height: 1.915m | **Cubic Capacity:** 15.3m³

35 Yard Roll-on-Roll-off Skip (Suitable for LIGHT waste types only)

Length: 6.145m | **Width:** 2.55m
Height: 2.385m | **Cubic Capacity:** 25.76m³

40 Yard Roll-on-Roll-off Skip (Suitable for LIGHT waste types only)

Length: 6.145m | **Width:** 2.55m
Height: 2.69m | **Cubic Capacity:** 30.58m³

Skip sizes may vary dependent upon location. Please check with your local Sales Department for availability.

Skips must only be level loaded, and there are certain waste types which are NOT allowed to be placed in general waste skips. Examples of these are: electrical items of any description, asbestos, plasterboard, fridge/freezers, car batteries, tyres, gas cylinders, paint tins (empty or full), food waste, fluorescent tubes, liquids, television sets or computer monitors. Please note there are many other types of hazardous waste and if you are in any way unsure, please speak to a member of our operations department BEFORE you place the item in the skip. Please note: Diagrams are not to scale and dimensions are approximate and are for guidance only.
