Waste Management Solutions

Hazardous, General and Industrial Services

We don't simply collect waste
- we transform it.

Our Business

Enva is a leading provider of recycling and resource recovery solutions, with locations across the United Kingdom and Ireland. With sustainability at the forefront of our proposition, we recover a broad range of hazardous and non-hazardous waste materials for re-use in manufacturing and energy conversion. We also provide a complete portfolio of industrial, water and waste water services. At Enva we are committed to recycling and resource recovery; it forms the basis of our business strategy and our values.

We support the life cycle of waste products to provide either a second life, such as the production of energy or, in many cases, closed-loop recycling solutions. Our dedication to developing new and innovative products and solutions and extending the life cycle of the world's resources is driving our business forward.

Our Services

From one-off collections to 'total waste management' solutions, our decades of experience and dedication to our customers has seen us set new industry standards.

We operate a diverse and fully owned fleet of state-of-the-art collection vehicles, designed to ensure the safe collection and transportation of all general, specialist and hazardous waste materials across a wide range of industries and sectors.

Metal Recycling

Partnering businesses to deliver a fully compliant and cost-effective service with recovery at its core.

Our Approach

Dedicated Customer Service

At Enva, we seek to understand, share learnings and improve how our customers waste resource is managed, and this is backed by continuous investment in technology, innovation and a dedicated team of experts. Our friendly, knowledgeable and experienced customer service team are here to help.

Reporting and Account Management

We provide direct access to existing customer reports, providing the management information needed to review current recycling % rates and waste movements. This information, combined with the knowledge of our team of expert account managers, ensures waste is managed as a resource to bring our customers commercial and environmental benefits.

Compliance Assured

Our online platform has been designed to meet waste transfer note and other legal compliance documentation storage requirements (equivalent to EDOC). The portal delivers full transparency on duty of care with waste transfer notes, movement confirmations and end destinations all being available with easy access.

Industries we support:

- Aerospace
- Transport
- Graphics and printing
- Medical
- Professional services
- Retail
- Technology
- Engineering
- Manufacturing
- Food production
- Water treatment
- Construction
- Energy
- Oil and drilling
- Education
- Local government
- Facilities Management
- Brokers

Garage Hazardous Waste Disposal

Our unique multi-compartment vehicles enable waste oil and small quantities of drummed waste to be collected in one visit.

On demand collections / Managed scheduled collections

- Oil Filters
- Anti-Freeze
- Brake Fluids
- Mixed Fuels
- Spray Booth Filters
- Rags & Absorbents
- Empty Aerosols
- Contaminated Plastics
- Lead Acid Batteries
- Hydraulic Hoses
- Grease Cartridges

Contaminated Top-ups

Spray Booth Filters

Lead Acid Batteries

Mixed Fuels

Bulk Collections

Closed-top and open-top 1000 litre IBC's can be provided for storage of larger quantities of hazardous waste.

Cage Collections

For larger producers of certain hazardous waste streams i.e. nominally empty plastic containers, we can provide cage units which have a greater storage capacity.

Curtainside Collections

Our fleet of curtain-sided vehicles are used for collecting larger volumes of drummed/IBC/palletised waste on an on demand or scheduled basis.

Anti-Freeze

Oily Rags

Interceptors & Forecourt Services

Enva provides a full range of forecourt services and interceptor cleaning solutions to ensure compliance with petroleum licences and environmental standards.

Interceptor maintenance

Environmental incidents, drain blockages and chamber overflows can be easily avoided with regular interceptor cleaning and maintenance.

To avoid the build-up of grit and dirt, interceptors must be cleaned and emptied regularly. Our experts plan appropriate interceptor cleaning solutions, ensuring that tanks are drained and managed responsibly. Additional cleaning and maintenance may also be required after any major rainstorms or events that may have caused additional debris to collect in the system.

Forecourt services

Maintaining safe, clean and efficient forecourts, and ensure compliance with petroleum licence renewals and local authority inspections is essential.

Our forecourt maintenance services include:

- Jetting of all surface gullies, channels and aco-drains
- Cleaning fill points and tank chambers
- Jetting down car wash slabs and removing waste
- Bund cleaning
- Grease trap cleaning

Having your forecourt cleansed as part of a regular maintenance schedule will not only improve its appearance but reduces the risk of overflows, blockages and spills.

Drainage Services

Ensuring drainage systems work effectively is key to minimising downtime and protecting against health and other environmental issues. Our expertise and state-of-the-art equipment supports efficient, compliant drainage networks and guards against potential health and environmental hazards, meaning fully operational and compliant drainage networks.

Key services:

- Drain jetting and cleaning
- 24/7 drainage emergency
- CCTV survey
- Sewers, culverts and tunnels
- Sewer, draining and pipework relining
- Septic tanks
- Jet vac & vacuum tankers
- Rehabilitation works, flow & load surveys, impermeable area surveys and topographical surveys

Enva's specialised equipment and vehicles transport the waste directly to our licensed facilities and we provide Certificates of Treatment/Disposal. We provide a full, traceable and compliant service to our customers providing all paperwork for regulatory and audit requirements.

Commercial Waste Services

We offer waste packages developed to Revise, Reduce and Recycle. Our carefully chosen network of partners operate on a national basis to offer scheduled collections of eurobins, front and rear loaders and roll on roll off containers.

Eurobin, Bag collection, Confidential waste

Designed for light compactable waste and recyclables are ideal for small businesses and businesses with limited space or access issues.

Bins are available in 140, 240, 660 and 1100 litre sizes. Bag collections are available for general waste and dry mixed recycling. Confidential and secure destruction sacks with consignment notes also available.

Front End Loader

Suitable for lighter compactable waste and recyclables and ideal for the larger commercial and industrial sector.

Skips

Predominantly used for site clearances, bulky waste items, wood and metal.

RoRo

Suitable for heavy, bulky and non-compactable waste.

Internal Recycling

Internal Office Recycling Boxes are available for either card and paper only, or for dry mixed Recyclables i.e card/paper/clean empty plastic bottles/cans/clean empty food packets.

Confidential Waste Destruction

With security paramount, this sensitive operation involves the collection and shredding of paper documents and IT equipment such as computer hard drives under strictly controlled conditions, with a formal 'Certificate of Destruction' issued as required.

Scrap Metal Disposal

Enva offers a disposal service for your waste scrap metal, we can provide 8/10 cu. yd open top skips or 10/12 cu. yd closed top skips for the storage of metal, including brake discs and wheel hubs. For smaller quantities of scrap metal we can provide a pallet box.

It is illegal for anyone to buy scrap metal using cash

Collections are made either on an on demand or scheduled frequency.

Industrial Hazardous Waste Disposal

Our Industrial services teams offer a wide range of hazardous and non-hazardous waste management and recycling services.

With on-site and mobile technical support, we are committed to working in partnership to understand your challenges and provide a bespoke solution to suit your industry and business.

We are dedicated to delivering sustainable waste management through continuous improvement and innovation, and you can be confident your waste will be dealt with in a low cost and responsible manner.

Key services:

- Drummed and packaged waste collection and disposal for a range of hazardous and non-hazardous components such as solvents, acids, alkalis, WEEE, aerosols, batteries, oils, paints, fluorescent tubes and bulbs.
- Small packaged waste collection
- Lab services and solutions
- Sampling
- Technical assistance, including DGSA support, packaging, labelling, storage and handling advice.
- Hazardous Waste Container collections for small amounts of mixed wastes (up to 20kg).
- Certificates of treatment/recovery/disposal provided as standard for auditing and compliance.

Our in-house laboratories determine the most appropriate treatment, recovery and disposal methods. Where waste cannot be treated at our own facilities, we work with trusted partners to deliver the most effective and efficient treatment solution.

Our team of professionals also advise on waste handling, waste storage and spills.

Site Clearance Services

Enva offers a comprehensive site clearance service, which includes a team of experts on hand to manage the project from start to finish.

During the site clearance, we will utilise our team to decommission services including but not limited to:

- Interceptors
- Oil storage tanks
- COSHH stores
- Waste compounds

We will utilise our expertise in the waste management industry to ensure all site clearances are conducted in the most cost effective, compliant and safest way possible.

Additional Services

WEEE Waste Disposal

Spent fluorescent tubes and sodium lamps contain mercury and phosphor powder and as such deemed to be Hazardous Waste. Other types of electrical waste include computers, monitors, televisions and printers. Fluorescent tubes and lamps are crushed at our other electrical items are sent to specialist outlets for recycling/recovery.

Tyre Disposal

Tyres cannot be sent to landfill and we use a network of dedicated companies who collect and reprocess into several alternatives including 'chip and crumb' for use in rubberised playing field surfaces.

Spill Containment

Enva offer a wide range of storage solutions to help you store your hazardous waste in a safe and compliant manner. Our Storage & Spill Containment Essential Products Catalogue includes competitively priced products available for immediate dispatch such as:

- Spill Bund and Pallets
- Waste Oil Tanks
- Spill Containment (Granules & Pads)

Colour Coded Recycling Bins and Labels

Reduce costs through recycling and source segregating non-hazardous and hazardous wastes. Bins and Label packages available.

Spray Gun Cleaning Equipment

Enva offers solutions tailored to your business requirements. We provide services that include regular machine maintenance and detergent replacement. The Enva team can also provide training on operating equipment and waste handling/storage.

Paint Tins

Bodyshop Waste Disposal

Bodyshop waste streams include:

- Aerosols
- Empty Mixing Pots and Paint Tins
- Full/Part Full Paint Tins
- Paint Contaminated Rags and Wipes
- Liquid and Solid Paint Waste
- Spray Booth Filters
- Waste Thinners
- Empty Containers.

Waste Paint

We will ensure the correct containers and labels are provided to assist with segregation of your wastes.

Waste Thinners

Cost effective cleaning

The cleaning unit recirculates solvent, thus reducing VOC levels and the amount of waste generated. The automated operation allows for optimal cleaning and use of solution. It also allows the user to multi-task.

Our spray gun cleaning machines are the only units in Europe to be approved by two spray gun manufacturers.

- Reduced VOC's through solvent saver system
- Improved user health and safety
- Dual and single automatic / manual machine options
- Solvent or water-based unit options
- ATEX approved
- All environmental paperwork is provided with waste removal.

Mixing Pots

Aerosols

Parts Degreasing Equipment

Non-hazardous environmental solution with the option of two different applications, makes this effective on all types of materials, including Aluminium, Steel, Plastics and many other materials while staying away from Solvent-based chemicals.

Parts Cleaning Range

Degrease components with a choice of powerful cleaning agents, removing grease, inks, paints and oils.

- Choice of 2 different styled units options come as 240v or 110v
- With Premium Degreaser our long lasting fluid and Odourless kerosene
- Machine replacement if required.

Manual Aqueous Parts Washers (foot operated)

- Heated detergent increases cleaning performance
- Stainless steel units
- Built in tank for soak facilities for stubborn stains
- Choice of detergents increases cleaning ability on different types of materials
- Non-hazardous solution provides an alternative to a solvent based product.

Automatic Heated Aqueous Units

The automated operation effectively reduces manual workloads and waste whilst drying the component, has a safety lock and changeable time cycle.

- Up to 75°C heated solution increases cleaning performance and provides a quicker dry on components
- Complete Stainless Steel unit
- Inline filtration basket filter
- Motorised basket on all models.

Heated Aqueous detergent provides a powerful cleaning agent for removal of grease, oil and ink.

Wipe-Smart Dispenser

Unique metal range of dispensers offer a more convenient, efficient and safer method of storing our wipers on your premises.

Services include regular machine maintenance and detergent replacement to improve cleaning efficiency. Training on operating equipment and waste handling / storage can also be provided. All environmental paperwork is provided with waste removal and replenishment of solution with correct labelling.
