

LABORATORY CHEMICAL WASTE MANAGEMENT

Rilta Environmental Limited offers a specialist National waste management service for schools, colleges and other organisations that have unused or obsolete laboratory chemicals on their premises.

The Premium Service:

Our expert team of DGSAs (Dangerous Goods Safety Advisors) will attend the premises, and will list, segregate, pack, label and remove the full range of chemicals for treatment at Rilta Environmental EPA licensed facility or for disposal at an approved facility abroad.

Transport is provided by dedicated carriers with National Waste Collection Permits and suitably trained and ADR certificated drivers.

Essential documentation, such as a Waste Transfer Form, is provided to accompany the waste in transit. For wastes that are exported, TFS (Transfrontier Shipment) permits are already approved and in place. A computerised waste tracking system and detailed certificates of recovery or disposal ensure that a full audit trail is available for the customers' peace of mind.

Quotation:

A quotation can be based on the customers own detailed list of chemicals or, alternatively, a member of the Rilta team can attend site to assess the task and provide a detailed 'fixed price' quotation to the customer.

Rilta Environmental Limited will provide a professional service that guarantees a comprehensive and cost effective solution to the issue of laboratory waste management.

Rilta Environmental Limited is fully ISO 9001 & 14001 and OHSAS 18001 certified and licensed under EPA Licence No. W0192-03.

It is the aim of Rilta Environmental Limited to provide an informed and immediate response to all environmental issues.

Rilta's continued growth and success has been built on premium
